DYNAMIC CURRENCY CONVERSION - DCC

For International Travellers

Your Guide to DCC Payments

Step 1 /

- › Enter the sale amount in Dirhams and press enter. Ask the customer for their card and insert it into the terminal.

Step 2 /

- › The terminal will automatically provide choice to customers to pay in their home currency or Dirhams. Simply offer the currency conversion by passing the terminal to the cardholder and ask them to select how they wish to pay. Remember to let your customer make the choice.

Step 3 /

- › After your customer has chosen the option, complete the transaction as normal.

Benefits of Saying Yes Include:

- The customer will know the final price of their bill in a currency that is familiar to them.
- Network will not charge any other fee.
- The customer gets today's exchange rate locked in.

If a customer says No to DCC and pays in Dirhams their bank will convert the transaction using their own exchange rates, applicable fees and charges that can vary greatly. The final cost of the bill will be unknown until the customer checks their statement.

You should not select on behalf of your customer - DCC gives your customers the control to choose what is best for them, let them choose and help them understand the benefits of saying YES.

Pay in over 140 currencies when using Visa® or MasterCard®
